Subject Please return the call from reporter Lee Van Der Voo
(b) (6)

Marianne, Jeff - Mark asked me to send this to you since he'll be out ...

Lee Van Der Voo ((b) (6)) is a freelance reporter writing a piece for Slate.com - she wants to know if the data collected from Oregon (Triangle Lake / Hwy 36 pesticide exposure investigation) will be used in the national Atrazine review (and is that review still on-going?). Scott Downey is the lead for EPA on the study.

The reporter said HQ essentially blew her off with an email directing her to the website.

She called us a few months ago while she was writing an article for Mother Jones magazine - that article will not be published. They're publishing an Atrazine edition in December but hers doesn't fit.

She called me and I told her I'd have Mark call her back. (b) (6)

Please let me know what you do (called, didn't call, want me to call her, asked Scott to call her, or?) - thanks!
k
